Appendix C ENVIRONMENTAL DATA RESOURCES, INC. DATABASE REPORT

EXECUTIVE SUMMARY

At the request of U.S. General Services Administration (GSA), AMEC Environment & Infrastructure, Inc. (AMEC) performed a Phase I Environmental Site Assessment (ESA) of the Former USDA Los Banos Field Office (hereafter referred to as "Site") located at 745 West "J" Street in Los Banos, Merced County, California. AMEC performed this work pursuant to our proposal dated May 2, 2012.

The purpose of the Phase I ESA was to identify recognized environmental conditions (RECs) at the Site using guidance provided in the American Society for Testing and Materials (ASTM) Standard E 1527-05, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment. The scope of work for the Phase I ESA included conducting a Site visit and area reconnaissance; obtaining and reviewing an environmental regulatory agency database report, topographic maps, and aerial photographs; evaluating the data; and preparing this report.

AMEC's Phase I ESA identified the following information, based on information made available:

- The Site is located on the northwest corner of West J Street and Maryland Avenue in a mixed commercial and residential area of Los Banos. Based on available information, the Site was vacant until 1950 when the current Site structures were developed.
- The approximately 0.41-acre Site consists of two buildings separated by a paved area. The northern building includes offices in the western portion and two enclosed garages on the eastern end of the building. The southern building is an open parking garage in the eastern portion and an enclosed garage and former soils lab on the western end of the building.
- A former gasoline underground storage tank (UST) and fuel island are located in the paved area between the two buildings. The gasoline UST was filled with sand and decommissioned in place in 1953 and has not been used since. In a letter dated June 14, 1995, from the Merced County Department of Public Health (County) to the USDA, the County granted in-place closure of the UST.
- During the Site reconnaissance multiple containers and a drum were observed that contained gasoline, ammonia, motor oil, brake fluid, hydraulic fluid and paint/varnish.
- A vault for a former hydraulic automotive lift was observed in the south building's enclosed garage. The interior of the vault was filled with fluid and a slight surface sheen was observed and piping that appeared to be associated with the lift was located on an adjacent wall and dark staining was observed at the base of the pipe and on the surrounding concrete.
- The Site did not show up on any regulatory lists as provided by Environmental Data Resources (EDR).
- An Environmental Lien report obtained for the property did not identify any environmental liens for the Site.
- A nearby property showed up on regulatory lists which indicated releases had occurred. The Los Banos Municipal Airport, located approximately 0.32 miles southsouthwest and upgradient of the Site was reported to have had a release of pesticides to shallow soil and groundwater and in addition, a UST release at the property is currently undergoing corrective action. Due to this property's upgradient

location, it is considered to have a low potential to impact subsurface conditions (groundwater) below the Site; however, it is not considered a recognized environmental condition to the Site.

This assessment has revealed evidence of the following REC in connection with the Site.

 The presence of a vault in the south building's enclosed garage that was filled with fluid and had a slight surface sheen. The vault is associated with a former hydraulic automotive lift and piping that appeared to be associated with the lift was located on an adjacent wall. Dark staining was observed at the base of the pipe and on the surrounding concrete.

In addition this assessment has revealed evidence of the following historical REC:

 The operation of the former gasoline UST in the central portion of the Site. Although there is no evidence that past releases have occurred and the UST has been granted closure, without documentation that a release did not occur, its historic operation represents a potential environmental concern.

Based on the results of this Phase I, AMEC recommends the following additional action:

- Installation of soil borings and collection of soil and groundwater samples in the vicinity of the vault and former UST to determine if past releases have occurred.
- Removal of the fluid from the vault in the south building's enclosed garage.
- Removal of the discarded chemicals, used tires, and used petroleum products at a licensed facility in accordance with applicable regulations.

1.0 INTRODUCTION

At the request of U.S. General Services Administration (GSA), AMEC Environment & Infrastructure, Inc. (AMEC) performed a Phase I Environmental Site Assessment (ESA) of the Former USDA Los Banos Field Office (hereafter referred to as "Site") located at 745 West "J" Street in Los Banos, Merced County, California. This ESA was conducted in general conformance with the scope and limitations set forth in the American Society for Testing and Materials (ASTM) Standard Practice E 1527-05 and pursuant to our proposal dated May 2, 2012.

1.1 PURPOSE AND SCOPE OF WORK

The purpose of the Phase I ESA is to identify recognized environmental conditions at the Site, as defined by the ASTM Standard E 1527-05, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. The work was also designed to permit the user to satisfy one of the requirements to qualify for the innocent landowner defense to Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability, as well as to evaluate the potential for general environmental liability associated with the Site.

"The term recognized environmental conditions (RECs) means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with applicable laws and regulations. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions."

The scope of work for the Phase I ESA included the following activities:

- Completing a Site visit on May 24, 2012; Site photographs are presented in Appendix A.
- Reviewing historical aerial photographs of the Site and its vicinity. Aerial photographs are presented in Appendix B.
- Reviewing United States Geologic Survey (USGS) 7.5-minute topographic maps to assess the physical setting of the Site and surrounding area (Appendix B).
- Obtaining and reviewing an environmental regulatory agency database report from Environmental Data Resources ([EDR], Appendix C).
- Obtaining an environmental lien report from EDR (Appendix B).
- Reviewing the "User Questionnaire" from USDA (Appendix B).
- Evaluating and correlating the data from the above activities.
- Preparing this report.

Our proposed scope of services for this Phase I did not include chain of title review, sampling or evaluating buildings for radon or asbestos-containing materials, evaluating ambient air quality,

identifying wetlands, or testing of the soil, air, surface water, drinking water, or groundwater for chemical contaminants. In addition, we did not conduct a fair market reduction assessment of the Site.

1.2 SPECIAL TERMS AND CONDITIONS

This document was prepared for the sole use of the GSA. No other party should rely on the information contained herein without the prior written consent of AMEC and GSA. The interpretation, discussion, and conclusions presented in this report are based on the Site visit and interviews; review of historical documents, the database report, and other documents as described herein.

Lack of evidence of the presence of RECs following completion of the tasks of a reasonable and mutually agreed upon scope of work does not guarantee the absence of such conditions; rather, it indicates only that none were found because of the services provided. Our findings and opinions are relative to the date of our Site work and should not be relied on to represent conditions on other dates. These opinions are based on information obtained during the study and our experience. If additional information becomes available which might change our conclusions, we request the opportunity to review the information, reassess the potential concerns, and modify our opinions, if warranted.

Although this assessment has attempted to identify the potential for environmental impacts to the subject Site, potential sources of contamination may have escaped detection due to: (1) the limited scope of this assessment; (2) the inaccuracy of public records; (3) the presence of undetected or unreported environmental incidents; (4) inaccessible areas; and/or (5) deliberate concealment of information.

The Phase I ESA was performed in accordance with generally accepted methods and practices of the profession. All conclusions are based on available and obtainable information and are not to be considered scientific certainties. The intent of this study was to identify environmental concerns that would be obvious to a professional exercising due diligence and is not intended to represent an exhaustive research of all potential hazards that may exist.

1.3 USER RESPONSIBILITY

Per the ASTM standard, it is the User's responsibility to communicate to the environmental professional any information that is material to recognized environmental conditions in connection with the subject property based on such specialized knowledge, actual knowledge, experience, or commonly known and reasonably ascertainable information within the local community. Per the ASTM standard, the User must do so prior to the property visit. The USDA provided ascertainable information concerning the potential for recognized environmental conditions at the subject property. In addition, the USDA completed a "User Questionnaire." Review of the User Questionnaire indicates that the USDA did not have any specialized knowledge or experience related to the property, that all information that they were aware of was provided to the environmental professional, and that there were no obvious indicators that point to the presence or likely presence of contamination at the property.

2.0 SITE DESCRIPTION

The following sections provide a description of the site features and physical setting of the Site.

2.1 LOCATION

The Site address is 745 West J Street, at the northwest corner of West J Street and Maryland Avenue in Los Banos, Merced County, California. The Site is in the western portion of the city of Los Banos in an area of mixed commercial and residential land uses. The Site occupies about 0.41 acre within the southeast portion of Section 15, Township 10 South, Range 10 East, Mount Diablo Baseline and Meridian. Figure 2-1 is a site location map, and Figure 2-2 shows the configuration of the Site.

2.2 PHYSICAL SETTING

The physical setting of the Site is described below.

2.2.1 Topography

The Site is at an approximate elevation of approximately 120 feet mean sea level (MSL) according to USGS Los Banos 7.5-minute quadrangle map (USGS, 1987). The area in the vicinity is generally flat with a slight decrease to east- northeast.

2.2.2 Surface Water and Hydrogeology

Surface drainage on the Site is controlled by curbs, gutters, and drain inlets and is discharged to the City of Los Banos drainage system. The Site and surrounding area are developed with buildings or pavement. The closest surface water feature is the Main Canal, located approximately 0.5 mile southwest of the Site.

The Site is located within the Delta Mendota groundwater basin. AMEC staff reviewed the most recent groundwater elevation map of the area from the California Department of Water Resources (DWR). According to the DWR, the groundwater elevation in the Site vicinity in spring 2009 was approximately 95 feet MSL, or about 23 feet below ground surface (bgs). AMEC staff reviewed the online well database maintained by DWR and located recent data for two wells within one mile of the Site, as presented in the following table.

Well ID	Location	Date	Depth to Water (feet bgs)	Groundwater Elevation (feet MSL)
10S10E10N001M 1.0 mile northwest of Site		11/1/2008	15.3	100.4
10S10E22H002M 0.7 mile south-southeast of Site		11/1/2008	16.7	103.5

2.2.3 Regional Geology

The Site is located in the central portion of the San Joaquin Valley, a deep structural basin, which was initially filled by Cretaceous and Tertiary age marine and continental sediments from the Sierra Nevada Range to the east. The Cretaceous deposits comprise the Franciscan Complex and the Great Valley Sequence while the Tertiary sediments deposited on the Cretaceous sequence are composed predominantly of sandstone and shale with minor conglomerate beds (Dibblee, 1971).

2.2.4 Oil and Gas Wells

Oil and gas wells are potential concerns when they seep oil or gas, are not abandoned to current regulations, or have associated surface contamination. They may also be associated with methane hazards. The Site is not within an identified oil field and the presence of unreported "wildcat" oil wells on or near the Site is considered unlikely. AMEC staff also reviewed the online database maintained by the California Department of Oil, Gas, and Geothermal Resources (DOGGR). The DOGGR database indicated that no oil or gas wells are located within one mile of the Site.

2.3 SITE AND VICINITY GENERAL CHARACTERISTICS

The approximately 0.41 acre Site includes two single story buildings separated by a central parking area. The areas adjacent to the sidewalks are landscaped.

2.4 ENVIRONMENTAL LIENS

An Environmental Lien report for the Site (Assessor Parcel Number [APN] 027-094-005) obtained from EDR, indicates that the current owner of the Site is the United States of America (USA). No records were identified indicating transferring of fee title ownership into the USA or when conveyance of the Site occurred. The reports indicate that no environmental liens or activity and use limitations were found for the Site. The lien report is included in Appendix B.

2.5 CURRENT USE OF THE SITE

The Site is currently vacant commercial office space that includes two buildings, a central paved area, and landscaped vegetation. The northern building includes offices and two enclosed garages on the eastern end of the building. The southern building is an open parking garage in the eastern portion and an enclosed garage and soils lab on the western end of the building.

3.0 SITE HISTORICAL REVIEW

AMEC reviewed historical uses of the Site and adjacent properties to assess whether prior occupants may have conducted activities that could be of environmental concern to the Site. This review included available historical aerial photographs and topographic maps. Sanborn Fire Insurance Maps were not available for the property. A copy of the "No Coverage" documentation is included in Appendix B.

Information obtained indicates that based on available information, the Site was vacant until the 1950s when the current Site structures were developed. The Site was initially utilized by the Department of the Interior and was acquired by the USDA in 1956. The Site has been vacant since approximately 2005.

3.1 PAST USES OF THE SITE

AMEC identified past use at the Site based on reviewing aerial photographs, and topographic maps.

3.1.1 Aerial Photographs

AMEC reviewed eight historical photographs taken between 1946 and 2006 provided by EDR. These photographs are presented in Appendix B.

- 1946: The Site and surrounding area is undeveloped grassland. The "Main Canal", a
 manmade water distribution canal is evident approximately 0.5 mile south-southwest
 of the Site and the residential area of Los Banos is present approximately 0.25 mile
 east of the Site.
- 1957: The Site buildings are present and consist of a rectangular building that bounds West J Street and a smaller rectangular building that bounds the south side of the property boundary. Due to the scale and quality of the photograph, detailed site features are not discernable. The immediate surrounding area is either undeveloped or occupied by residential and small commercial/retail type buildings. The municipal airport is also now present approximately 0.25 mile west of the Site.
- 1972: The Site appears unchanged. The property immediately to the east has been
 developed with a large rectangular building and majority of surrounding properties
 have now been developed with residential or commercial/retail type structures.
 Significant development of residential communities has occurred to the west and
 southeast.
- 1984: The Site and surrounding area appear to be generally unchanged. A building and associated parking lot has been constructed on the east side of Railroad Avenue.
- 1987, 1998, 2005 & 2006: With exception of continued residential development of the surrounding area and interspersed development of larger warehouse type buildings to the south the Site and surrounding area appear to be generally unchanged.

3.1.2 Topographic Maps

AMEC reviewed four historical topographic maps for the Site dated from 1921 to 1987 provided by EDR; these maps are presented in Appendix B. The 1921 map is a large scale map that depicts the City of Los Banos and the surrounding area including the water distribution canal

and the Southern Pacific railroad line that bisects the city. No structures are evident onsite. In 1960, the Site building that bounds West J Street is depicted onsite. In the surrounding area, the municipal airport is now depicted west of the Site and numerous structures are present in the main part of the city. No changes to the Site are evident on the 1961 and 1987 maps. In the surrounding area, the maps indicate significant development has occurred as evidenced by multiple residential structures to the east and west.

3.1.3 City Directory

AMEC reviewed a City Directory Abstract for the Site and surrounding area provided by EDR that covered the period between 1975 and 2000. The Site address was not listed in the City directories during the 1975 to 2000 timeframe. For the surrounding area, the directory identified a mix of residential and retail businesses for addresses surrounding the Site. The retail businesses included motels, financial services, several restaurants, the City Hall and a publishing company.

3.2 INTERVIEWS

Interviews with Ms. Ellen Johnson and Ms. Lori Perez of the Natural Resources Conservation Service (NRCS) were conducted by AMEC during the Site reconnaissance. Neither party was aware of any environmental issues or studies directly associated with the past operations of the Site.

3.3 Previous Environmental Studies Involving the Site

There have been no known previous environmental studies involving the Site. According to NRCS records a gasoline tank (described in further detail in Section 4.2.1) which formerly operated at the Site was decommissioned in place in 1953 and has not been used since.

4.0 SITE AND AREA RECONNAISSANCE

AMEC representative Ms. Leslie Purvis, REA, performed the Site reconnaissance on May 24, 2012. Ms. Purvis was accompanied by Ms. Johnson and Ms. Perez of the NRCS. Photographs of the site reconnaissance are presented in Appendix A and the reconnaissance is described in the following subsections.

AMEC performed the reconnaissance by first inspecting the interior of the buildings, then touring the perimeter of the Site, and documenting observations with photographs and notes. The weather during the visit was sunny, breezy, and warm; surface conditions on the Site were not obscured by inclement weather.

4.1 GENERAL OBSERVATIONS

The Site includes two buildings separated by a paved area. The northern building includes offices in the western portion and two enclosed garages on the eastern end of the building. The southern building is an open parking garage in the eastern portion and an enclosed garage and soils lab on the western end of the building. According to NRCS records, the buildings were constructed in 1950 with slab-on-grade or raised foundations, wood and stucco siding, and composition shingle roof. A small concrete slab is located in the paved area between the two buildings; according to NRCS, the slab is the former location of a gasoline UST and fuel island. The remainder of the Site is occupied by paved or landscaped areas. According to Ms. Johnson, the Site has been vacant since about 2005.

4.1.1 Aboveground and Underground Storage Tanks, Drums, and Containers

No aboveground storage tanks (ASTs) were observed during the Site reconnaissance. According to NRCS records, a former gasoline UST and fuel island are located in the paved area between the two buildings. The gasoline UST was filled with sand and decommissioned in place in 1953 and has not been used since, according to NRCS records. A letter dated June 14, 1995, from the County to the USDA, indicated that Merced County approved closure in-place of the UST.

The following drums and containers were observed during the Site reconnaissance:

Material	Location	Comments	
"UCAR Solution Vinyl"	North bldg east garage	Broken 50-lb. sack of white vinyl resin powder	
Blue poly drum	North bldg east garage	55-gallon drum appeared to be empty	
Gasoline	North bldg central garage	2-gallon container was half-full	
Ammonia	South bldg enclosed garage	1-gallon container	
Motor Oil	South bldg enclosed garage	Two or three 1-quart containers	
Brake Fluid	South bldg enclosed garage	1-pint container	
Hydraulic fluid	South bldg enclosed garage	1-pint container	
Paint/varnish	South bldg enclosed garage	Two 1-quart containers	
Non-hazardous rubbish	Adjacent to north building	Roll-off bin; disposal contracted to Allied Waste	

4.1.2 Hydraulic Equipment

A vault for a former hydraulic automotive lift was observed in the center of the floor in the south building's enclosed garage. The interior of the vault was filled with fluid and a slight surface

sheen was observed; the quantity of liquid within the vault is unknown. Piping that appeared to be associated with the lift was located on an adjacent wall; dark staining was observed at the base of the pipe and on the surrounding concrete. The piping extended through the wall into the adjacent soils lab, but was open and unconnected to any equipment.

4.1.3 Heavy Machinery

No heavy equipment or machinery was observed onsite.

4.1.4 Petroleum Products. Hazardous Materials, Vents and Piping

The following petroleum products were observed at the Site:

Material	Location	Comments
Gasoline	North bldg central garage	2-gallon container, half full
Tires	South bldg enclosed garage	Used tires
Motor Oil	South bldg enclosed garage	1-quart container
Brake Fluid	South bldg enclosed garage	1-pint container
Hydraulic fluid	South bldg enclosed garage	1-pint container
Fluid in sump	South bldg enclosed garage	Slight sheen observed; no odor.

The following hazardous materials were observed at the Site:

Material	Location	Comments
"UCAR Solution Vinyl"	North bldg east garage	Broken 50-lb. sack, white vinyl resin powder
Ammonia	South bldg enclosed garage	1-gallon container
Paint/varnish	South bldg enclosed garage	Two 1-quart containers

No leaks or staining associated with these materials was observed.

Piping extending from the floor or ground was observed in the following locations during the Site reconnaissance:

Location	Comments
Former fuel island	Hose bib; 3 other pipes/vents may be associated with the former UST
South bldg enclosed garage	Piping appears associated with the former hydraulic lift
South bldg enclosed garage	Piping appears associated with the former air compressor
South bldg soils lab	Piping appears associated with lab sink

With exception of the staining in the vault, no leaks or staining were observed.

4.1.5 Utilities

According to Ms. Johnson, utilities are provided to the Site as follows:

Utility	Provider
Natural Gas	Pacific Gas and Electric (PG&E)
Electricity	PG&E
Water	Los Banos Municipal
Sewer	Los Banos Municipal
Sanitation	Allied Waste

4.1.6 Asbestos-Containing Building Materials

Based on the date the Site was constructed, asbestos-containing building materials may have been used. Determining the asbestos content of building materials is outside the scope of this Phase I ESA.

4.1.7 Leaded Coatings

Based on the date the Site was constructed, lead coated materials such as lead-based paint may have been used. Determining the lead content of building materials is outside the scope of this Phase I ESA.

4.1.8 Polychlorinated Biphenyls (PCBs) and Mercury

No transformers were observed on the Site during the reconnaissance. Due to the pre-1978 construction of the buildings, electrical equipment and materials such as fluorescent light ballasts, switches, and window putty have the potential to contain PCBs. The fluorescent light tubes/lamps and HID lamps may contain mercury vapor. Several thermostatic controls which are suspected to contain mercury switches were also observed.

4.1.9 Other Possible Areas of Concern

Other than as described in the previous sections, during the Site visit AMEC did not observe evidence of the following:

- Remnants of former buildings
- Chemical or petroleum smells or foul/unusual odors
- Landfill or burial activities
- Pits, ponds, lagoons, or seeps
- Stained soil, corrosion, stressed vegetation, or soil stockpiles
- Water wells or septic tank/leach field systems
- Chemical spills or releases (other than the broken sack of white powder)
- Discharges, leachate, migration, or run-on of potential contaminants from offsite sources

4.1.10 Adjacent Properties

AMEC conducted a visual reconnaissance of the properties adjoining the Site by observing the adjacent properties from public rights-of-way. No apparent evidence of potential RECs was observed on road rights-of-way or on the parcels immediately adjacent to the Site.

- North: The Site is bordered to the north by J Street and commercial property.
- East: The Site is bordered to the east by the Los Banos Methodist Church.
- **South**: The Site is bordered to the south by residential property.
- **West**: The Site is bordered to the west by Maryland Avenue and commercial property.

5.0 REGULATORY AGENCY DATABASE REPORT REVIEW

ASTM Standard E 1527-05 identifies standard federal and state environmental "record sources" that should be reviewed to identify RECs. The standard defines approximate minimum search distances from the Site for the types of properties listed in these records. The search radii are identified in Section 5.2 for each list described. The principal criterion is whether offsite properties could impact environmental conditions on the Site, although the appearance of a property in an environmental database does not necessarily mean that it has hazardous materials/wastes problems or poses a risk to the Site.

AMEC obtained and evaluated an environmental regulatory agency database report from EDR. The EDR report identifies properties listed in ASTM-recommended databases within recommended search distances from the Site and provides information on listed properties. The EDR report is included as Appendix C, and the results of the search are summarized below.

Based on the observed local and regional topography and the physical setting and resources reviewed (see Section 2.2), groundwater flow direction is expected to be toward the east-northeast. Therefore, upgradient properties are presumed to be those west-southwest of the Site.

5.1 THE SITE

The Site was not listed in any of the databases searched by EDR.

5.2 OFFSITE PROPERTIES

AMEC conducted a review of regulatory lists published by federal and state regulatory agencies to evaluate whether the listed properties identified as having a past or present record of actual or potential environmental impact or are under investigation for an environmental impact have the potential to impact the Site. Regulatory listings are limited to only those properties that are known to regulatory agencies at the time of publication to be contaminated, in the process of evaluation, subject to monitoring for potential contamination or otherwise regulated. Listed facilities identified within the ASTM-defined search distances of the Site are discussed below.

Federal Environmental Record Sources

 Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS; December 27, 2011). CERCLIS contains data on potential hazardous waste sites that have been reported to the U.S. Environmental Protection Agency (EPA) by states, municipalities, private companies, and private persons pursuant to the CERCLA. The CERCLIS List includes sites that are either proposed for the National Priorities List (NPL) or in the screening and assessment phase for possible inclusion on the NPL. Source: EPA/National Technical Information Service (NTIS). Source: EPA.

There are no listed CERCLIS properties within 0.5 mile of the Site.

 CERCLIS-No Further Remedial Action Planned (NFRAP; 0.5 mile), December 28, 2011. No NFRAP properties are those removed from CERCLIS because, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the property to be placed on the NPL, or the contamination was not serious enough to require federal Superfund action or NPL consideration. The purpose of the NFRAP is to remove unintended barriers to the redevelopment of the properties as part of EPA's Brownfields program to promote economic development of unproductive urban properties. Source: EPA.

There is one listed CERCLIS-NFRAP site within 1/2 mile of the Site. The Los Banos Municipal Airport, located approximately 0.32 miles south- southwest and upgradient of the Site is on this list. Based on a preliminary assessment completed in August 2000, it was determined that the case did not qualify as an NPL site and was given a no further action status. The property also appears on the EnviroStor list due to the presence of pesticides in shallow soil and groundwater and the Regional Water Quality Control Board's Spills, Leaks, Investigations and Cleanups list due a release from a UST system. A preliminary assessment was recommended by the Department of Toxic Substances Control in 2001 for the pesticides; however, as of this date no additional work has been performed. The UST release is currently undergoing corrective action. Due to this property's upgradient location, it is considered to have a low potential to impact subsurface conditions (groundwater) below the Site.

• National Priorities List (1.0 mile), May 8, 2012. The NPL is a subset of CERCLIS and identifies over 1,200 properties for priority cleanup under the Superfund program. An NPL (i.e., Superfund) Site must meet or surpass a predetermined hazard ranking system score, be chosen as a state's top priority Site, or meet three specific criteria set jointly by the U.S. Department of Health and Human Services and the EPA. Source: EPA.

There are no NPL sites within one mile of the Site.

- Resource Conservation and Recovery Act (RCRA) Info, March 15, 2012. RCRA
 Info includes selected information on facilities that generate, transport, store, treat
 and/or dispose of hazardous waste, as defined by the RCRA. Source: EPA/NTIS.
 RCRA Info includes the following databases:
 - RCRA Treatment, Storage, and Disposal (TSD) Facilities (0.5 mile). Facilities that treat, store, and/or dispose of hazardous wastes.
 - There are no listed treatment, storage, and/or disposal facilities within 0.5 mile of the Site.
 - RCRA Generators Lists (0.25 mile). RCRIS large quantity generators (LQG) are those facilities that generate at least 1,000 kilograms per month (kg/month) of nonacutely hazardous waste or meet other applicable RCRA requirements. RCRIS small quantity generators (SQG) generate less than 1,000 kg/month of nonacutely hazardous waste or meet other applicable RCRA requirements. RCRIS conditionally exempt small quantity generators generate less than 100 kilogram (kg) of hazardous waste or less than 1 kg or acutely hazardous waste per month.

Many RCRIS generators also appear on either or both of two non ASTM lists; Facility Index System (FINDS) and Hazardous Waste Information System (HAZNET). The EPA's FINDS provides facility information and "pointers" to other databases (e.g., Permit Compliance System, Aerometric Information Retrieval System, and Federal Facilities Information System).

There are no listed large quantity generator properties within 1/4 mile of the Site.

There is one listed RCRIS SQG within 0.25 mile of the Site. Los Banos Community Hospital (520 West I Street), is listed on the RCRIS SQG list. There are no known environmental cases related to this property, and therefore, is considered unlikely to impact subsurface conditions at the Site.

There are no RCRA - CESQG within 0.25 mile of the Site.

Corrective Action Report (CORRACTS, 1.0 mile), August 19, 2011. CORRACTS identifies hazardous waste handlers with RCRA corrective action activity. Source: EPA.

There are no listed CORRACTS properties within 1.0 mile of the Site.

• Records of Decision (RODS, 1.0 mile), September 28, 2011. ROD documents mandate a permanent remedy at an NPL site containing technical and health information to aid the cleanup. Source: EPA.

There are no listed ROD properties within 1.0 mile of the Site.

• Sites with Engineering and/or Institutional Controls (US Eng and US INST Controls, 0.5 mile), December 30, 2011. These lists are specific to ASTM E 1527-05 and identify properties with engineering and/or institutional controls in place to eliminate, control, or limit contamination. Source: EPA.

There are no listed US Eng or US INST Control properties within 0.5 mile of the Site.

State Environmental Record Sources

AMEC reviewed the following ASTM E 1527-05 required databases:

- Leaking Underground Storage Tank Information System (LUST, 0.5 mile),
 March 14, 2012. The LUST database lists reported leaking underground storage tank incidents. Source: State Water Resources Control Board (SWRCB).
 - **Ten LUST properties are within 0.5 mile of the Site.** Of the 10 properties, nine are listed as "Completed Case Closed" and are considered unlikely to impact subsurface conditions at the Site. The remaining property, Tosco Bulk Plant (101 H Street W.), is located approximately 0.40 mile northeast and downgradient of the Site and undergoing remediation. Due to this property's regulatory status and distance downgradient of the Site, it is considered unlikely to impact subsurface conditions at the Site.
- Hazardous Substance Storage Container Database (UST, 0.250 mile), January 17, 2002, Facility Inventory Database (FID, 0.250 mile), October 31, 1994, and Historical UST (Hist. UST, 0.250 mile), October 15, 1990. These databases are listings of facilities that have (or had) underground storage tanks. Active UST facilities gathered from local regulatory agencies. No updates of these lists are planned. Sources: SWRCB for two UST lists, Cal/EPA for FID.

The presence of a property on the UST list only indicates that registered UST(s) are or have been present on the properties. The data are 15 or more years old. Federal and state UST regulations required that tanks installed before January 1, 1984, be abandoned, replaced, or upgraded by December 22, 1998.

There are no listed FID, UST, or Hist. UST properties within 1/4 mile of the Site.

Statewide Environmental Evaluation and Planning System (SWEEPS)
 Underground Storage Tank (UST, 0.25 mile) database contains registered
 USTs, June 1994. This UST listing was updated and maintained by a company contacted by the Water Board in the early 1990s. The listing is no longer updated or maintained as of June 1994.

There are no listed SWEEPS UST properties within 0.25 mile of the Site.

 AST, 0.25 mile, database contains registered ASTs, August 1, 2009. The data come from the Water Board Hazardous Substance Storage Container Database.

There are no AST properties within 0.25 mile of the Site.

 The Waste Management Unit Database System (WMUDS/SWAT; 0.5 mile) is used for program tracking and inventory of waste management units, April 1, 2000. The source is the Water Board and is no longer updated or maintained.

There are no WMUDS/SWAT sites located within 0.5 miles of the Site.

• Spills, Leaks, Investigations and Cleanups (SLIC) listing is provided by the California Regional Water Quality Control Board, March 19, 2012.

There are two SLIC sites located within 0.5 miles of the Site. The Los Banos Municipal Airport and Tosco Bulk Plant were discussed above in the CERCLIS NFRAP and LUST sections respectively. The Los Banos Municipal Airport was considered to have a low potential to impact subsurface conditions (groundwater) below the Site while Tosco was considered unlikely to impact subsurface conditions below the Site.

• **ENVIROSTOR (1 mile), March 14, 2011.** The Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further.

There are two EnviroStor sites located within 1 mile of the Site. The Los Banos Municipal Airport was discussed above in the CERCLIS NFRAP section and considered to have a low potential to impact subsurface conditions at the Site. AG Ground Services (20058 Cardoza Road) is almost one mile south southeast and downgradient of the Site and due to its distance and downgradient direction considered unlikely to impact subsurface conditions below the Site.

Orphan Sites

The orphan or unmapped site list consists of sites with poor address quality, usually without zip code information. However, if street addresses are available, these site locations are checked against the known vicinity of the Site to evaluate if they are within the select ASTM search distance. None of the orphan or unmapped sites appeared to be within the required search distance of the Site. Furthermore, none of the listed orphan sites were noted in the vicinity of the Site during our area reconnaissance.

Other Lists

Multiple other regulatory lists summarized in the EDR report in Appendix C were also reviewed but are not listed above. Properties which were included on these lists are not expected to impact the Site.

5.3 REGULATORY FILE REVIEW

AMEC reviewed online geotracker (http://geotracker.waterboards.ca.gov) and EnviroStor (www.envirostor.dtsc.ca.gov) for the Los Banos Municipal Airport to verify regulatory status of the release cases.

5.4 DATA GAPS

The EPA's proposed All Appropriate Inquiry document (40 Code of Federal Regulations [CFR] 312.10) states that a data gap means "a lack of or inability to obtain information required by the standards and practices listed in Subpart C of Part 312 despite good faith efforts by the environmental professional or persons identified under Part 312.1 (b), as appropriate, to gather such information pursuant to Part 312.20 (d) (1) and Part 312.20(d) (2)."

The following presents AMEC's interpreted data gaps, resolution efforts, and our opinions on the data gap significance.

Data Gaps, Resolution Efforts and Opinion on Data Gap Significance				
General data gap description	Specific gap	Good faith efforts	Opinions on data gap significance	
Historical records	Documentation was not available for all land use dates.	AMEC reviewed reasonably ascertainable maps and aerial photographs.	Low significance- The available historical information provides sufficient information to support historical uses at the Subject Property.	
Interviews	Complete ownership interviews were not available.	Contacts were not readily available for past owners. AMEC attempted to obtain information from the current owner.	Low significance - With respect to the current commercial development, the reviewed historical photos, maps, and tenant information provides sufficient information to support historical use at the Subject Property.	

6.0 CONCLUSIONS AND RECOMMENDATIONS

At the request of the GSA, AMEC has performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E 1527-05 of the Former USDA Los Banos Field Office located at 745 West "J" Street in Los Banos, Merced County, California. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report. This assessment has revealed evidence of the following REC in connection with the Site.

 The presence of a vault in the south building's enclosed garage that was filled with fluid and had a slight surface sheen. The vault is associated with a former hydraulic automotive lift and piping that appeared to be associated with the lift was located on an adjacent wall. Dark staining was observed at the base of the pipe and on the surrounding concrete.

In addition this assessment has revealed evidence of the following historical REC:

 The operation of the former gasoline UST in the central portion of the Site. Although there is no evidence that past releases have occurred and the UST has been granted closure without documentation that a release did not occur, its historic operation represents a potential environmental concern.

Based on the results of this Phase I, AMEC recommends the following additional action:

- Installation of soil borings and collection of soil and groundwater samples in the vicinity of the vault and former UST to determine if past releases have occurred.
- Removal of the fluid from the vault in the south building's enclosed garage.

Removal of the discarded chemicals, used tires, and used petroleum products at a licensed facility in accordance with applicable regulations.

July 3, 2012 Final GSA64286 Phase I ESA – Los Banos

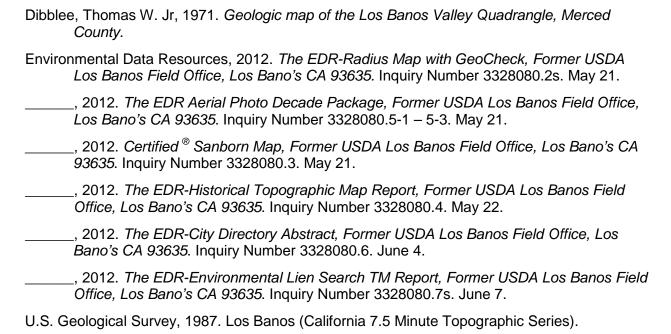

7.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in § 312.10 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Gary A. Lieberman, CEM

Project Manager

APPENDIX A Site Photographs

SITE PHOTOGRAPHS

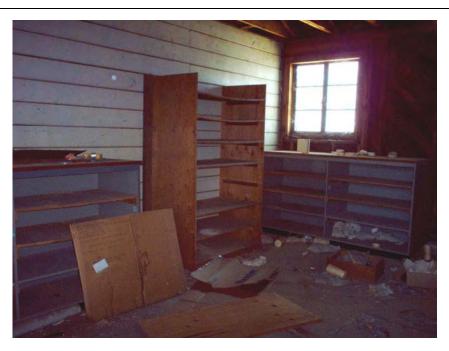

Photograph 1 North building, east garage. Discarded equipment and rubbish.

Photograph 2 North building, east garage. Empty poly drum, discarded equipment and rubbish.

SITE PHOTOGRAPHS

Photograph 3 North building, east garage. Rubbish, discarded racks and shelving.

Photograph 4 North building, east garage. 50-pound sack of white powdery substance. Label read "Union Carbide UCAR Solution Vinyl."

SITE PHOTOGRAPHS

Photograph 5 North building, west garage. 5-gallon fuel container was half-full and labeled "dirty gasfor cleaning only."

Photograph 6 North building, west garage. Discarded equipment and rubbish; caged storage area on north end of room.

SITE PHOTOGRAPHS

Photograph 7 North building, west garage. Another view of caged storage area.

Photograph 8 South building, enclosed garage. Discarded tires and box of miscellaneous chemicals (Ammonia, linseed oil, motor oil, brake fluid, power steering fluid).

SITE PHOTOGRAPHS

Photograph 9 South building, enclosed garage. Former hydraulic lift in center of room; vault contained liquid and a slight oily sheen.

Photograph 10 South building, enclosed garage. Foreground is piping to hydraulic lift and darkstained concrete; lift vault is in upper right-hand corner of photo.

SITE PHOTOGRAPHS

Photograph 11 South building, soils lab adjacent to enclosed garage. Piping from hydraulic lift in next room extends through wall and is open/unconnected. Small-diameter piping may be related to former air compressor.

Photograph 12 South building, soils lab. Piping extending from floor and 15-gallon water bottle.

SITE PHOTOGRAPHS

Photograph 13 South building, soils lab. Shop sink, plumbing to sink, and soap bottle.

Photograph 14 Center of driveway entrance. Concrete pad of former fuel island. Note piping for water, air, and possibly fuel tank vent line.

SITE PHOTOGRAPHS

Photograph 15 North building interior. One of two large work areas; flooring appears to be original linoleum from 1950s. The remainder of the building was carpeted; unknown if linoleum is beneath carpeted areas.

Photograph 16 North building interior. Restrooms have newer linoleum flooring.

SITE PHOTOGRAPHS

Photograph 17 North building interior. Typical office space.

Photograph 18 North building exterior, looking northeast. Non-hazardous rubbish is disposed by a contractor (Allied Waste).

SITE PHOTOGRAPHS

Photograph 19 South building exterior, looking southeast. The eastern portion includes 9 open parking bays; the western portion includes the enclosed shop and soils lab (out of picture at right).

Photograph 20 At northeast corner of site, looking south along eastern property boundary. Los Banos Methodist Church occupies the adjacent parcel to the east (at left of photo).

SITE PHOTOGRAPHS

Photograph 21 At northeast corner of site, looking west along northern property boundary. J Street is at right.

Photograph 22 At northwest corner of site, looking south along western property boundary. Maryland Avenue is at right.

SITE PHOTOGRAPHS

Photograph 23 At southwest corner of site, looking northeast. Maryland Avenue is at left, residential property is at right (both out of photo).

Photograph 24 Southern building, interior of parking stalls. Surface is paved.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

The EDR Environmental LienSearch™ Report

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

TARGET PROPERTY INFORMATION

ADDRESS

Former USDA Los Banos Field Office 745 West J Street Los Banos, CA 93635

RESEARCH SOURCE

Source 1: Merced County, California Assessor Source 2: Merced County, California Recorder

PROPERTY INFORMATION

Deed 1:

According to the Merced County Assessor, the current owner of the subject property is the United States of America. Records were searched at the Merced County Recorder's Office. No conveyance was found of record transferring fee title ownership into the United States of America for the subject property.

Legal Description: All that certain piece or parcel of land being portions of Lots 71 and 72, Page Addition, being a portion of Section 15, Township 10 South, Range 10 East, Mount Diablo Base and Meridian, situate and lying in the County of Merced, State of California.

Legal Current Owner: United States of America

EDR Historical Topographic Map Report

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

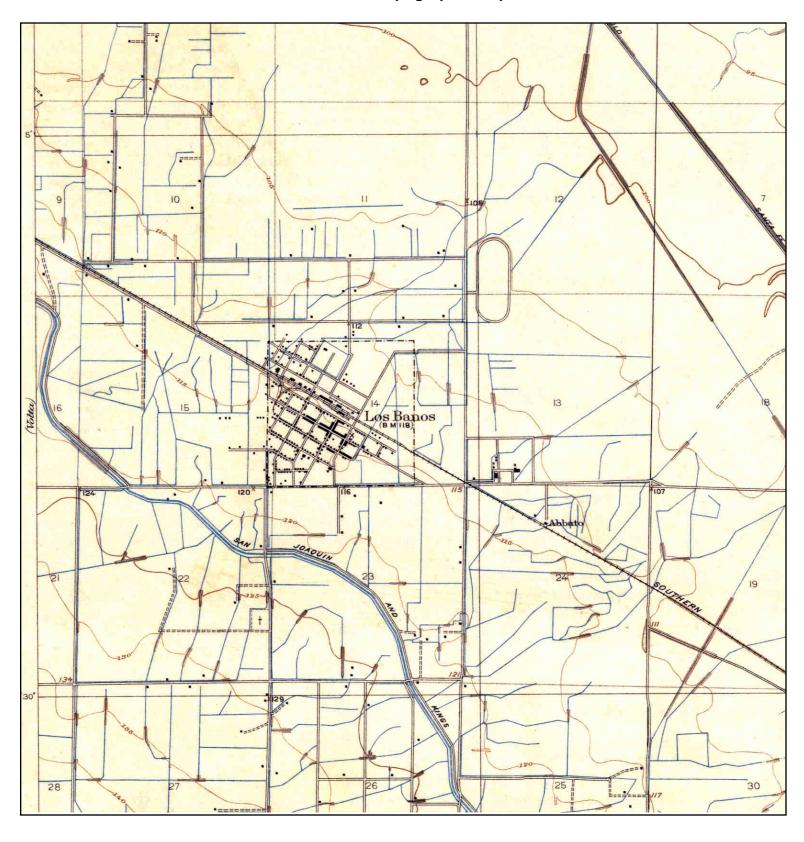

Thank you for your business.Please contact EDR at 1-800-352-0050 with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 12/28/2011 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
LOS BANOS AIRPORT	WEST I & AIRPORT RD.	SSW 1/4 - 1/2 (0.324 mi.)	A3	9

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/15/2012 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
LOS BANOS COMMUNITY HOSPITAL	520 W I ST	NE 1/8 - 1/4 (0.166 mi.)	2	8

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 03/14/2012 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 03/19/2012 has revealed that there are 10 LUST sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 03/15/2012 has revealed that there is 1 RCRA-NonGen site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Site History: A gasoline fuel product line leak was found in February of 1987 at

> this site and repaired. In November of 1997 the underground storage fuel tanks at this site were removed and over-excavtion of fuel contaminated soil was completed. A Soil Vapor Extraction System was installed and started operation in November of 2008 following the measurement of significant levels of petroleum vapor in the subsurface. The Soil Vapor Extraction System was shutdown in

December of 2010.

Potential Media Affect: Aquifer used for drinking water supply

Potential Contaminants of Concern: Diesel, Gasoline

Site History: In January of 1990 ten underground storage tanks (USTs) were removed

from this site. 14 groundwater monitoring wells were installed

between 2002 and 2004 documenting a significant release of petroleum compounds to groundwater. These groundwater impacts were found to have traveled several blocks to the northeast from the site, but do not seem to provide a threat to the City's drinking water supply.

Following 2004, many additional groundwater wells for both assessment and cleanup were installed. Between September and October of 2005 successful soil vapor extraction (cleanup) tests were completed. Limited soil vapor extraction was implemented between January 2006 and October of 2006 in areas of the site with significant petroleum

residuals in the subsurface. Offiste injection of oxygen and

hydrogen peroxide into groundwater was implemented between September

and December of 2006 that destroyed petroleum compounds in groundwater. In August of 2007 dual vapor extraction (cleanup) was tested and found not to be effective at this site. An initial soil vapor survey was completed in May of 2008 that was followed by a Health Hazard Risk Assessment (HHRA) in March of 2009. The HHRA did not indicate a significant health risk from petroleum compounds

released at this site to existing off site residents or commercial site workers. A long-term soil vapor extraction system (cleanup) was started at the site in December of 2008. In conjunction with this on-site cleanup, hydrogen peroxide and ozone injection are being implemented offsite to cleanup up petroleum impacts to groundwater.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Number of Days to Update: 40 Next Scheduled EDR Contact: 07/23/2012
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

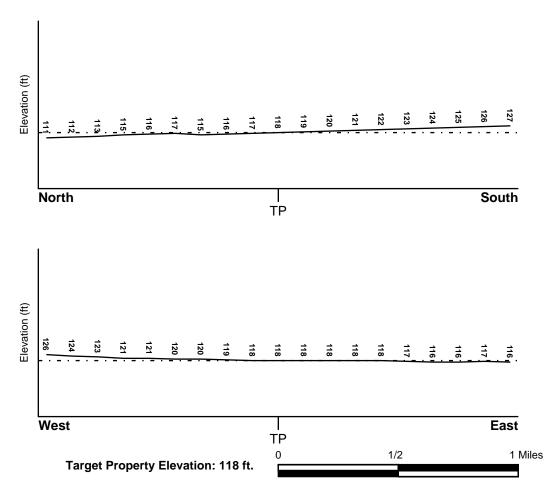

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

 LOCATION
 GENERAL DIRECTION

 MAP ID
 FROM TP
 GROUNDWATER FLOW

 Not Reported
 GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: URBAN LAND

Soil Surface Texture:

Hydrologic Group: Not reported

Soil Drainage Class: Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: DOSAMIGOS

Soil Surface Texture: clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	5 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
2	5 inches	29 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
3	29 inches	61 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map. USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations Source: Department of Conservation

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
